I can call at nine. Give info for call.

I was out on personal business yesterday and things are crazy today...

Subject: Tuesday morning

I understand Tuesday will be crazy, but can the 3 of us talk around 9 to discuss how best to approach the north extension of the Removal Area? I can send results from today's coring which shows a lot of rock and some sediment sitting on the slope of this area on certain spots only. Can talk about that slope and how best to handle it, as well as the sediment and sand at the northern tip just outside the removal area.

If you can each talk, can you text me to let me know? 973-978-9621. We can use my conference number.

Stan
